About Me

A highly ambitious and motivated individual with high aspirations for myself. I'm a family man above all else who has found a new passion in life, software engineering. I'm an avid learner and I want to create things that will leave a positive impact on the world. I highly value self-improvement, responsibility, and freedom. Recently I finished a 4 month school program at DAE (District Arts & Education) which is where I began my journey in learning how to code, design and develop websites, and much much more.

Thank you for reading my resume. I'm looking forward to speaking with you!!
